Abstract: *The Online Quiz System is a web-based application developed using HTML, CSS, PHP, and MySQL. The main purpose of this project is to provide a platform where users can take quizzes online easily and get their results instantly. This system helps in reducing manual work and makes the process of conducting quizzes faster, more accurate, and efficient. The application has two main modules: the admin module and the user module. The admin can create, update, and delete quiz questions, manage users, and view results. The user can register, log in, attempt quizzes, and view their scores after completing the test*
