

# Investigation and Adoption of Front-end Frameworks for E-commerce Development

Tamanna Sharma

Under Graduate Student, Department of Computer Science and Information Technology  
Dronacharya College of Engineering, Gurgaon, Haryana, India

**Abstract:** *Web development, as the newest industry trend these days, leads the front-end development to currently heading at a tremendous speed that tends to make it difficult to keep up with. There are a variety of front-end frameworks on the market, including React, Angular, Vue, and jQuery. Finding the best framework for e-commerce and user friendliness has become a top priority in web development. This paper provides an overview of popular front-end frameworks as well as an outline of their benefits and drawbacks based on various factors.*

**Keywords:** Research Paper, Front-end frameworks, Web development, React, Vue, Angular, Javascript, Angular, E-commerce, Frameworks.
