Abstract: *"Creativity is piercing the mundane to find the marvelous." – Bill Moyers*
Every child is naturally gifted with innate abilities which form an intrinsic part of their personality. At Furtado's School of Music, we believe in the power of creativity as we encourage young impressionable minds to channel their creative ideas in the right direction. We aspire to celebrate every unique aspect of a child as we provide them with a platform to indulge in a plethora of learning opportunities through the discipline of Fine Arts.
