**Abstract:** In this review article we are focusing on *Asperagus racemosus*. *Asperagus racemosus* commonly known as Satamuli, satavari, satawar. *Asperagus racemosus* also known as shatavari used as medicinal plant. The Ayurvedic plant *Asperagus racemosus* wild belongs to family Liliaceae. It shows medicinal therapeutic properties such as antibacterial, anticancer, antioxidant, antidiarrhoea, antiinflammatory, diuretic, antitubercular galactagogue, antiulcer. By the various review it is seems that the whole plant also used for evaluating various pharmacological activity. In this review we are generally discussed about the pharmacological activity reported by using various in-vitro and in-vivo models.

**Keywords:** Asperagus Racemosus, shatavari, pharmacological activity, In-vivo, In-vitro Models
