**Abstract:** *This paper introduces Internet of Things (IoTs), which offers capabilities to identify and connect worldwide physical objects into a unified system. As a part of IoTs, serious concerns are raised over access of personal information pertaining to device and individual privacy. This survey summarizes the security threats and privacy concerns of IoT. This survey also tell us about the applications of IOT and what are the network system used in IOT and the intelligent system used in IOT.*

**Keywords:** Internet of IOT Threats, Security, Privacy.
