Abstract: In our day-to-day life we can see that technology is evolving constantly. The internet of things (IoT) contains various applications and technologies that are available in smart homes, smart irrigation, and healthcare. The IoT acts as an expanded version of the internet, which provides us with the data we need to live our lives more efficiently. It is based on connecting up devices used daily. The main objective of this paper is to learn how to use IoT in Smart Homes, Healthcare, and Agriculture.

Keywords: Internet of Things (IoT), IoT Architecture, Smart Home, Smart Healthcare, Smart Agriculture
