

5G Wireless Technology

Ankita Ananda Patil

Student, Department of MCA

Late Bhausaheb Hiray S. S. Trust's Institute of Computer Application, Mumbai, India

Abstract: *5g technology means fifth generation mobile technology. 5g denotes the next big stage of mobile telecommunications standards beyond the upcoming 4g standards. The majority of high-bandwidth consumers' access to their phones will shift thanks to 5g technology. By transferring 5g to a voip-enabled device, people will experience a level of call volume and data transmission never experienced before.*

Keywords: 5g technology, features of 5g
