A Role of Artificial EduTechnologies in Education

Mr. Rajesh Yadav

Assistant Professor

V. K. Krishna Menon College, Mumbai, Maharashtra, India

Abstract: *Artificial Intelligence in Education is a popular issue since it is rapidly changing how we learn. So, what does this imply for kids? Is there a change in children's learning processes as a result of AI integration? For every youngster, artificial intelligence in education has the potential to be a game-changer. Many schools across the country are already implementing AI, and you should be aware of how AI might assist your child. Here I have tried to give a technical view of Education using AI-powered technologies, its challenges, advantages and disadvantages.*

Keywords: Education, Artificial intelligence, Technology, Chatbots, Virtual Reality
