Abstract: *The use of Internet, World Wide Web and Mobile Technologies revolutionized the provision of information and the facility for the user to take action on the information required. The use of internet enables users to manage placement process. This led to a unique web based placement management system grown specifically by the placements practitioner and the software programmer to become Training and Placement (TOP) system. TOP system is an application that can be accessed throughout the organization with proper login provided. This system can be used as an application for the Training and placement officers (TPO) of the college to collect the student information with regard to. Students logging should be able to transmit their information in the form of a Resume. In manual Training and Placement, all the work done by human intervention due to which there were maximum chances of errors.*

Keywords: Aggregate Marks, Company name, Time Table, Notification.
