**Abstract:** *Trust is a central part of all human relationships and a fundamental element of social capital. For many years pharmacists have consistently been named among the top 5 most trusted professionals in national surveys. The expanded role of pharmacist uplifts them to patient care from dispensing manufacturing or marketing of drug. Along with doctors and allied health professionals, pharmacists are increasingly recognized as an integral part of patient care team. The covid-19 infection that is caused by a novel strain of corona virus was first detected in China in the end of December 2019 and declared a public health emergency of international concern by the World Health Organization on January 30, 2020. Pharmacists play an essential and unique role within the healthcare team to optimize patient care during this COVID-19 pandemic. Different pharmacies such as hospital pharmacy community pharmacy clinical pharmacy industrial pharmacy etc and pharmacist working there play essential role in patient health care and building trust of public consistently.*

**Keywords:** Pharmacist, Community Pharmacy, Health, Trust.
