**Abstract:** *Vidarbha is been lagging in terms of infrastructure development. In the region of Vidarbha, inadequate irrigation facilities are becoming a hurdle for the overall development of the region. Lack of irrigation has also deprived the farmers of this region in availing the consequential benefits like subsidies on fertilizers, pump sets, etc. Hence newer and advanced machineries are used to improve the overall productivity. Backhoe loaders are used for multipurpose applications like digging, dozing, canal work and land development etc. The research paper aims to understand the impact of earthmoving equipment specifically backhoe loaders on farm productivity in Vidarbha.*

**Keywords:** Backhoe loaders, farm productivity
