Abstract: *To evaluate the quality of pharmaceuticals, it is crucial to consider the quality factors of herbal remedies herbal formulations. The total of all elements that directly or indirectly affect the product's security, efficacy, and acceptance constitutes the quality of herbal medicines. The absence of formulation criteria, however, is a problem for herbal medications. The primary constraints are the absence of formulation for raw materials, processing techniques, and final goods, dose formulation, and the absence of quality control standards. To assure the quality, safety, and efficacy in herbal medicines using current, appropriate GMP standards.*

Keywords: Quality Control, Herbal Drugs, Medicinal Plants & GMP GLP Standardization
