Abstract: *Over one billion people throughout the world practise Hinduism as their religion. Hindus mostly reside in India and Nepal. Hinduism has been India's primary religion for countless years. Before 2000 B.C.E., when the Harappa Civilization of the Indus Valley flourished, the religion is said to have its roots. Hinduism is now widely recognised as a polytheistic religion that combines the veneration of several gods with the conviction in a single divine reality (Molloy 78). Puja, which is a kind of devotion that a person offers to the image of a god or couple of deities, is a crucial component of this ancient religion. It is necessary to bring all Pooja supplies from the market. In this situation, carrying out this religious rite turns into an exercise if the area we reside in is unfamiliar or if we have only recently moved there. One must discover the solutions to every query, from where to obtain Supplies to where to deliver the items. Vedik Pooja is a distinctive website that addresses user needs, recommends the fundamental items of components required for the procedure, and deals with the poojas that users desire to perform. It is an automated system that also enables access to all Pooja-related information for individuals all around the world. Users can also communicate with pandits online to learn more about their respective fields of expertise. In cities where pandits are difficult to find, this software is quite important.*

Keywords: Vedik Pooja website, pandits, ancient religion
