Abstract: *The internet is going crazy over Chat GPT, an artificial intelligence-based chatbot that research group Open AI published on November 30,2022.The arrival of Chat GPT is changing the internet world. It was a wonderful demonstration of the intelligence that went into gathering and analyzing the data. In just a few days, it shattered all records and reached 10 lakh users. To accomplish the same feat, it took years for Twitter, Netflix and Facebook. All industries, including education, health, law, finance, and customer service, are increasingly using this chatbot. About 50% of American businesses have started using Chat GPT, according to a recent poll. Also, it was discovered that half of the businesses are using chat bots in place of employees. The entire world is eager to see how this new technology will impact people's lives.*

Keywords: Chat GPT
