**Abstract:** *This article describes how an Android application may be used to manage and lighten the workload of RG Legal Associates personnel. This paper introduces and streamlines RG Legal Associates' manual labour. The lawyer and other office employees can readily access all the client data that our programme puts up because it is quite tough to manually recall all the information pertaining to a client. Numerous features from Android, including calling, messaging, and location, are used today, making work for RG Legal Associates quick and simple.*

**Keywords:** Mobile Application, RG Legal Associates
