Abstract: *Nowadays everyone has a motor vehicle and accidents are one of the worst scenarios that can happen with anyone of us at any time. Lot of peoples facing difficulties getting help when their vehicle breaks down on the middle of their journey. Many of them do not have any automobile repair service provider's contact number and could not get help as the automobile repair service providers might be far away from their locations. These problems are the motivations for the development of this project to help those who are in need when their vehicle breaks down along the roads. So Anywhere AutoTech is the app which will help the customers to connect with nearby garages and make it easy to solve the problems regarding their vehicles. The customers will not have to bother while they stuck with problems regarding to their vehicles.*

Keywords: RFID, GSM, attendance system, efficiency, reliability, scalability
