Abstract*: For the purpose of present study (n= 100) parents of martial art players were selected as subjects from different C.B.S.E and State board schools of Gondia and Bhandara District. Samples were selected by using Random sampling method. Study was delimited to parents of players participating in Judo and Taekwondo martial arts only.100 parents were selected from state board and 100 subjects were selected from C.B.S.E schools of Gondia and Bhandara. For the collection of the data structured questionnaire was used and collected responses were present after statistical analysis.*

Keywords: martial art, Judo, Taekwondo, players

I. INTRODUCTION

ATTITUDE:

In psychology, an attitude is an expression of favor or disfavor toward a person, place, thing, or event (the attitude object). Prominent psychologist Gordon Allportonce described attitudes "the most distinctive and indispensable concept in contemporary social psychology."Attitude can be formed from a person's past and present. Key topics in the study of attitudes include attitude measurement, attitude change, consumer behavior, and attitude- behavior relationships.

Attitude – Refers to acquired skill or ability that is assumed to underlie, and is conducive to, an individual's capacity to learn and attain a level of achievement in a specific field. Attitude – Refers to predisposition to perceive feel or behave towards specific objects in a particular manner.

Table no 1: Table showing Attitude of Parents of Judo Players towards Martial Art

N	Highly Positive	Positive	Null	Negative	Highly Negative
100	19.6%	41.2%	11.5%	26.3%	1.4%

Above table showing the Attitude responses of parents of Judo players towards martial arts in which 19.6% found highly positive towards martial art, 41.2% shows positive attitude, 11.5% shows null attitude, 26.3% shows negative attitude and only 1.4% shown highly negative attitude towards martial arts.

Table no 2: Table showing Attitude of Parents of Te-Kwando Players towards Martial Art

N	Highly Positive	Positive	Null	Negative	Highly Negative
100	21.2%	42.8%	11%	15.3%	9.7%

Above table showing the Attitude responses of parents of taekwondo players towards martial arts in which 21.2% found highly positive towards martial art, 42.8% shows positive attitude, 11% shows null attitude, 15.3% shows negative attitude and only 9.7% shown highly negative attitude towards martial arts.

II. RESULTS

After the analysis of the data it is found that:

- 20.40% parents found highly positive toward martial art.
- 42.00% parents shown positive attitude toward martial art.
- 11.25% parents shown null attitude toward martial art.
- 20.80% parents shown negative attitude toward martial art.
- 05.55% parents shown highly negative attitude toward martial art.
