Abstract: A face wash is a type of facial washing product that is used to remove makeup, oil, filth, and dead skin cells from the skin. Face wash products are intended to cleanse faces without leaving them unduly dry. It is also commonly referred to as "cleanser." Face wash is a mild cleaner that satisfies the needs of maintaining clear, smooth, germ-free, and fresh skin. Additionally, it moisturizes the skin's horny layer without being overly abrasive. That skin looks so young and vivid. Face wash is advertised as having the following benefits: it will cleanse, hydrate, stop acne and wrinkles, and even out skin tone. Face wash was made using varying amounts of ingredients, and standards including pH, irritation, hardness, This article reviews the various types of essential oils and ayurvedic or herbal ingredients that can be used to make face wash, including lavender, peppermint, turmeric, black cumin seed, jasmine, and cinnamon oils. It is found that all skin types benefit equally from this product. friability, thickness, foaming capacity, and accelerated stability were assessed

Keywords: face wash

I. INTRODUCTION

Taking hygiene into account is crucial. Engaging in outdoor activities exposes the skin to UV radiation, bacteria, dust, and pollution, all of which can lead to skin disorders and a decrease in skin suppleness. The skin, which is the outermost layer of the human body, is constantly exposed to the elements. This includes exposure to sunlight, air humidity and temperature. Excessive air pollution and dusty surroundings can cause the skin to appear dull and unclean. The equilibrium of the skin will be upset by this. Everyone wants to have healthy facial skin, but maintaining healthy facial skin requires maintenance. Cleaning the facial skin is one way to maintain clean, dirt-free skin on the face.

Clean milk, cleansing cream, refreshing agent, or washing solution can all be used to clean the face. Facial wash is another option. Water alone cannot fully remove oil and dirt from the face; a facial wash is necessary to rid the face of any remaining filth. Cleaning the face alone with water and without the use of soap leaves the skin feeling less clean

and as though the dirt is still there. Essential oils are natural substances with antibacterial, antioxidant, anti-acne, anti-inflammatory, anti-aging, skin-lightening, and sun protection qualities that are used in the cosmetic business. Essential oils have gained a lot of popularity as a skincare ingredient in recent years. Many make use of the biological qualities of essential oils in skincare products to maintain the skin's youthfulness, health, and freshness as well as to protect it from environmental harm.

Skin care preparation for face :

- Face pack and masks
- Cleansing creams and lotion
- Rouges Face washes
- Compact powder FACE WASH

Face washes can be used to provide skin-fairness, moisture, anti-wrinkle, and anti-acne benefits. It is believed that skin-lightening agents function by inhibiting the generation of melanin in melanocytes, hence lowering the amount of melanin on the skin's metabolism and melanin production. Whitening cosmetics contain substances including propanediol, arbutin, kojic acid, evodia rutaecarpa fruit extract, and vitamin C and its derivatives that decrease the production of melanin because they are not poisonous to melanocytes.

Advantages of facewash

- It helps to remove dead skin cells that helps new skin cells replace old one.
- It helps to keep skin fresh and healthy.
- It makes the skin to look radiant.
- The mixture of dead skin cells and excessive oil clog pores, which can lead to acne white heads, blackheads and total weary appearance.
- Removing dead skin cells that means your skin will develop wrinkles at a slower pace.
- The exfoliation accelerates the blood circulation and promotes skin regeneration and rejuvenation. Facial pores and Oily skin is caused by over secretion of sebum by sebaceous glands which clogs the makes the skin oilier.

Disadvantages of FaceWash:

1. **Overuse:** Excessive use of face wash can strip the skin of its natural oils and disrupt the skin's moisture barrier. This can lead to dryness, irritation, and even overproduction of oil as the skin tries to compensate.
2. **Sensitivity:** Some face washes may contain harsh chemicals or fragrances that can cause skin sensitivity, redness, or allergies in individuals with sensitive skin.
3. **Ineffectiveness on Makeup:** While face washes can help remove makeup to some extent, they may not be as effective as dedicated makeup removers, especially for heavy or waterproof makeup. In such cases, a double cleansing routine may be necessary.
4. **Environmental Impact:** Some face washes contain microplastics or harmful chemicals that can have adverse effects on the environment when washed down the drain. Choosing eco-friendly, biodegradable products can help mitigate this issue

Uses of face-wash

1. Morning Routine Gently wash your face in the morning; this effectively clears away perspiration, extra oil, and pollutants that may have accumulated overnight.
2. Removal of Makeup Prior to retiring for the night, meticulously eliminate every hint of makeup using either micellar water or an oil-based facial cleanser.
3. Double Cleansing The double washing technique requires an initial application of an oil-based cleanser; this is subsequently followed by a water-based face wash—an approach that guarantees a thorough and deep clean.
4. Post-Workout Cleansing After an intense workout, meticulously wash your face to eliminate sweat and bacteria; doing so will effectively prevent post-workout breakouts.

Properties of face wash

1. Exfoliation encourages skin renewal and regeneration while quickening blood circulation.
2. The excessive production of sebum by sebaceous glands clogs facial pores and contributes to oily skin.
3. To minimize oil accumulation and unclog pores, cleansers containing herbs and botanicals are necessary for individuals with oily skin. Anti-inflammatory and antioxidant-rich ingredients in these exfoliating cleansers help to repair and nourish damaged skin.
4. Herbal face wash, well-known for its health benefits, is applied to acne and pimples. Herbal face wash, which has rich plant-based ingredients like neem, eliminates extra oil from the skin without depleting it of its nutrients.

II. FORMS OF FACE WASH

Cream based face wash

Gel based face wash

Liquid based face wash

Face wash in powder form

1. Cream based face wash: A cream-based face wash leaves your skin feeling moisturized and clean. Typically, a cream-based face wash is rich, creamy, and packed with vital hydrating ingredients like plant oils. It will assist you in eliminating any debris, perspiration, makeup, or microorganisms. For dry skin, cream-based face washes and creamy cleansers are ideal. They eliminate all pollutants from the skin without depriving it of its natural oils.

2. Gel based face wash-Gel face wash is a type of water-based facial cleanser that resembles gel and is usually formulated with floral and essential oil extracts. Gel face wash that can assist in PH balance for your skin. It is advised to use gel face wash on skin types that are sensitive, irritable, or irritating. Even while a lot of gel face washes remove excess oil, they don't completely strip your skin of its oil, which makes them suitable for dry skin as well. If you want a face cleanser that really cleans your skin, go for gel. It allows for a thorough cleaning of your pores and gets rid of excess oil and debris from the surface of your skin all at once by unclogging them using a moderate formula that doesn't irritate your skin.

3. Liquid based facewash-Since liquid facewashes provide a high degree of dosage flexibility, are simple to swallow, and have a rapid beginning of action, they are frequently utilized in pharmaceuticals. They are usually divided into two major categories: monophasic and biphasic formulations, which include a variety of dose forms. In monophasic liquids, the active pharmaceutical ingredient (API) dissolves entirely in the vehicle; in biphasic liquids, the API is suspended or disseminated in the vehicle, creating two phases instead of a full dissolve. The kind of API and the intended therapeutic effect are thought to be the two main determining variables when selecting a liquid dose form.

Herbal ingredient	Synthetic ingredient	Essential oil
multani mitti, yoghurt, sandalwood powder, besan, rose water, aloe vera, Peach Extract, Witch hazel Extract, Cucumber Extract, Pea Extract, Turmeric, Neem Extract, Tulsi Extract,	retinol, salicylic acid, ceramides, vitamin glycerin, fragrance, Formaldehyde, Parabens, Phthalates, Alcohol, Synthetic colors, Caprylyl glycol, Petrolatum, lauryl sulfate,	<i>Carum nigrum</i> (Black caraway), <i>Anethum graveolens</i> , <i>Apium graveolens</i> (Celery), <i>Foeniculum vulgare</i> (Fennel), <i>Pimpinella anisum</i> (Anise), <i>Cuminum cyminum</i> , <i>Corriandrum sativum</i> , <i>Origanum vulgare</i> ,

Vitamin-C-rich fruits, milk, curd, honey,	Triclosan, Glycerin, Toluene, Phenoxyethanol, Diethanolamine, Preservative, Sulfates, Thickeners	<i>Melissa officinalis</i> (Lemon balm), <i>Salvia officinalis</i> , <i>Mentha longifolia</i> (Wild Mint), <i>Mentha piperita</i> (Peppermint), <i>Mentha spicata</i> , <i>Ocimum basilicum</i> (Sweet Basil), <i>Rosmarinus officinalis</i> (Rosemary), <i>Lavandula officinalis</i> (Lavender), <i>Salvia sclarea</i> (Sage Clary) <i>Citrus medica</i> (Lemon), <i>Citrus paradisi</i> (Grape fruit)

Studies of evaluation:

1. Organoleptic Properties: The look, color, and smell of the prepared facewash were assessed. It emits a distinctive floral smell.
2. Consistency: Liquid consistency is produced by the formulated composition. Visual observation verified this.
3. Greasiness: When applied to the skin, the formulated compositions do not feel greasy.
4. pH: It was discovered that the formulation's pH fell within a suitable range of 5.5–5.7. The pH of the skin is fresh, indicating that the created compound may be skin-compatible.
5. Washability: Water could be used to easily wash the prepared formulations.
6. Homogeneity: A visual examination of the prepared formulation reveals that it is devoid of fiber and particle particles and has a uniform color dispersion without lumps.
7. Grittiness: There is no grittiness seen in the produced formulation.

III. LABELING AND PACKAGING

A manufactured item that completely or partially encloses a number of products is called a package. The art and science of packaging is delivering a product to the final customer safely, soundly, and for the least amount of money possible. Packaging really protects what it sells and sells what it protects.

PURPOSE OF PACKAGING:

Items are packaged for the following purposes, using appropriate packaging:

1. To make storage and transit easier.
2. In order to prevent contamination.
3. To avoid unintentional spoiling.
4. To avoid being stolen from.
5. To reduce deterioration.
6. To determine the contents and quality of the products.
7. To declare who made the thing that is contained.
8. To describe the recommended usage of the product

IV. CONCLUSION

Face wash observed with good spreadability, grittiness and consistency, foamability. It helped to enhance glowing skin that's not only healthy and clean but also aesthetically appealing. Given the vast assortment catering to an array of skin requirements, be it your type or specific issues, it becomes imperative to properly select a suitable one. More over regardless of whether you aim to eliminate make up residues, address acne concerns, or simply rejuvenate your complexion, incorporating a quality face wash into your daily skincare routine should remain non-negotiable. So, cleanse away and allow your inherent beauty to emerge
