Abstract: *Many pet stores also offer retail products online. The most important factor for shopping online for pets is that United States households and many other countries that shopped online for pet care products in 2018 was 13 million. The advantage of this is the various offers provided by online platforms and the convenience of shopping from the step of your home.*
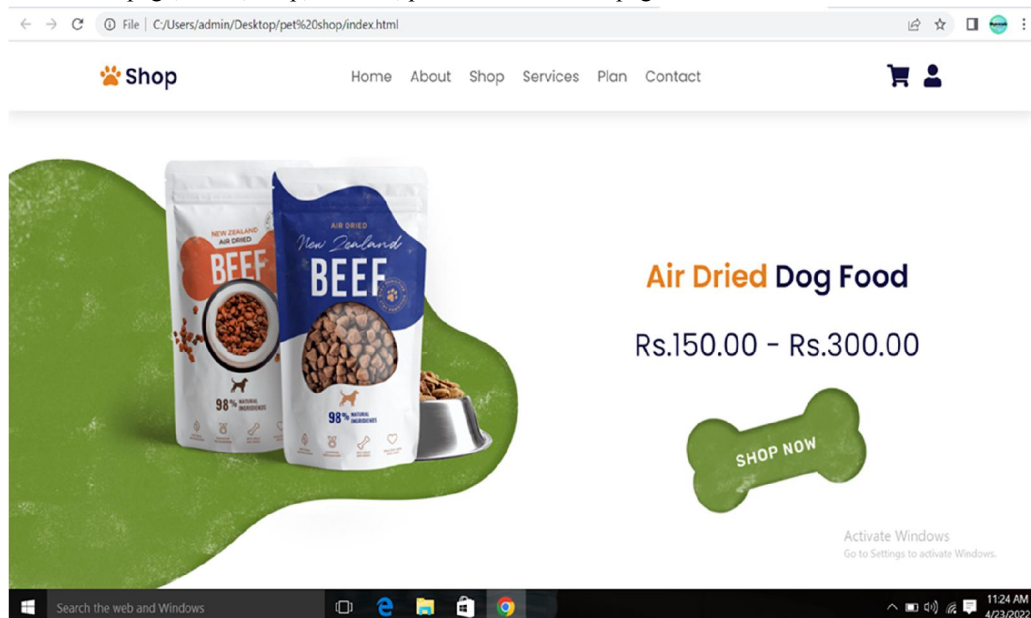

Keywords: Pet, Shopping, Online, Shop, Pet food, Products

I. INTRODUCTION

The pet retail industry is growing at a faster speed than the past years. Total sales in 1994 were 17 billion dollars, while actual sales in 2010 were 48.35 billion with 2011 sales projected to reach 50.84 billion dollars. The pet retail segment has become the 7th largest retail segment in the India .A pet shop or pet store is a retail business which sells different kinds of animals to the public. A variety of animal supplies and pet accessories are available all over the world in this industry. Many pet stores offer shopping with their dog but there are many pet owners who are not comfortable with shopping with their dog and prefer staying indoors to shop for their daily needs as it's more convenient and hassle free.

II. PROPOSED SYSTEM

Shop Management System interface to a pet shop owner to manage his petshop activities. This web application provides the users an option to shop and manage the daily needs of their household pets. There are a total of 6 menus on our website which includes home page, about, shop, services, plan and the contact page.

We have developed a very user friendly interface for our website which provides a hassle freeway throughout your time spent with us. It starts off with the home page including a theme of dogs and their products. We have included a lot of pet food items as well as accessories for pet grooming and enjoyment. After that you can add your favourite products to cart or wishlist and proceed with the shopping. There are food items from the top most pet food manufacturers in the world. The

customer can search for the type of breed they want and also look at the details of that breed including their health. After that they can also enter animal data of other breeds, and next the customer can also save their contact information for future use. The user can add animal name, breed, category, weightage, cost, height, and fur of the animal. Next, after adding the animal data, he/she can view all list of the pet animals stored in the pet shop management system. If the user wants to edit an animal data, simply click on the animal, and then an update button will appear which will instantly allow the user to enter new details and update it. In order to delete the data, the user has to first enter animal id and then click delete to confirm and delete the pet data. There are a lot of more tasks we will be adding in the future and make this the best website having the best user interface to work on.

III. LITERATURE REVIEW

This paper presents the development of the Pet Shop Management System (PSMS) for Klinik Veterinar & Surgeri Jawhari. PSMS is able to manage the pet information such to produce the pet birth certificate and the pet vaccine schedule. There are various things and topics which are important for the pet industry worldwide such as their health, vaccines, food as well as keeping them happy and giving them a friendly environment to stay in. The management system of pets helps with all of these things as it provides the pet owners with their daily needs and also provides medical help. It has powerful feature extraction and learning capabilities. Because of its various advantages, it has been applied in many fields.

IV. USES

1. It is convenient.
2. You can buy any breed.
3. You can get the best quality..
4. Less time needed.
5. Easy to access.
6. More variety.

V. CONCLUSION

Nowadays pets are one of the factors that makes our life more colorful. Many research and studies confirm the psychological and health benefits for the pets owners. Dogs are the most favorite pets and often called human companions because of their friendly and loyal attitude towards their master. The World Health Organization (WHO) said about 70 percent of households in the world have one or more dogs. Hence, we want to build a petshop that not only accommodates dogs. But I made a pet shop that gives a sensation about the world of dogs. Start from providing a variety of dog needs like a cage, shampoo, dog food, and others with affordable prices.
