

# College Campus Network

Mrs. Jasmine Sagaya Jonita<sup>1</sup>, Sri Pavithra. R<sup>2</sup>, Bavatharani. S<sup>3</sup>

Assistant Professor, Department of Information Technology<sup>1,2</sup>

Final Year Student, Department of Information Technology<sup>1,2</sup>

Nirmala College for Women, Red Fields, Coimbatore, Tamil Nadu, India

**Abstract:** The project is Entitled as “COLLEGE CAMPUS NETWORK”. This project is gave the solution for college campus, to serves placement opportunities is one of the important modes of communication in India. The main aim of the project is student can't be missing the placement opportunity then placement cell officer check information. This project implementation is the computerized system (online) of placing the students in advanced. Student must login into system; they can write and posted any message on various topic of their choice. Can register upload image with their post all student registration will be approved or rejected by the admin. As well as the post will kept bending and it higher authority approves or rejects each and every post. Placement officer can create a list of a student by specifying the department and criteria this will includes basic details marks. Placement officer can create a list of a student by specifying the department and criteria this will includes basic details marks placement officer can send verification regarding placements. The project titled “College campus network” is developed with: XML AND JAVA as front end and SQLITEDATABASE as back end.

**Keywords:** Campus Network

## I. INTRODUCTION

The main purpose of this “COLLEGE CAMPUS NETWORK” project is to simplify the process of handling placement offers for students. System allows Admin to Add the HOD, faculty and students. The will help to the students for placement. Communicate with the people share the ideas and activities events. The individual network this app also provides feature of writing and posting of a post or an event all at the one place admin have authority to add or delete students faculty to the system. Student must login into system; they can write and posted any message on various topic of their choice. Can register upload image with their post all student registration will be approved or rejected by the admin. As well as the post will kept bending and it higher authority approves or rejects each and every post. The students can view the placement opportunity for the college campus. Thus no placement chance will be missed

## II. METHODOLOGY

Data Flow Diagram (DFD)

**LEVEL 0**

**LEVEL 1**

### **III. PROPOSED SYSTEM**

The current system that is going to be built overcomes all the difficulties given above. The Students are in direct contact with the Professor, so there is no need of the intermediate. In this proposed system make easy communication between student and staff by using smart mobile phones.

#### **3.1 Proposed System Advantages**

1. This provides a direct way of Know their education information.
2. Students can use the placement opportunity for the career.

#### **3.2 Project Description**

##### **Module Description**

##### **Modules**

##### **ADMIN:**

- Admin is responsible for the management of college campus network.
- Admin has the responsibility for add the faculty, HOD, student. Admin only maintain the add details.
- Admin can add the faculty, student, HOD. Then only login with the details in login form.

##### **HOD:**

- HOD can view the placement cell and exam cell as well as the students performance.

##### **FACULTY:**

- Faculty can add the placement info for all the students.
- Placement faculty may be responsible for a large number of departments
- The exam cell officer can post the placement opportunity..

##### **Student:**

- Student can view the message and participate in the placements. In this part we are covering all the details related to college required for student-name, Register number, email id, department, and Phone number.
- With this application no students will miss the opportunity.
- Students can use the placement opportunity for the career.

### **IV. CONCLUSION**

The computerization of “COLLEGE CAMOUOC NETWORK” has been developed successfully in Android with SLITE server to fully satisfy the objective framed by the user.

This provides a direct way of Know their education information. Easley understandable User Interface.

As well as the post will kept bending and it higher authority approves or rejects each and every post. Placement officer can create a list of a student by specifying the department and criteria this will includes basic details marks. Placement officer can create a list of a student by specifying the department and criteria this will includes basic details marks placement officer can send verification regarding placements.

The project is developed such that it can be executed at any system. The project is a platform independent and maintains data security. This system is protected from any unauthorized person to access this system. This project is developed keeping in mind all the demerits of the existing system. It is developed to eliminate all the demerits and adding extra features.

### **SCOPE OF FUTURE ENHANCEMENT**

This project has covered almost all the requirements. Further requirements and improvements can easily be done since the coding is structured or modular in nature. Further enhancement can be made to the application. Number of student can register to the application for developing placement knowledge. This application can be used by any student to participate in the placement and get appropriate information by viewing all college placement information's.
