Abstract: *Over one billion people throughout the world practise Hinduism as their religion. Hindus mostly reside in India and Nepal. Hinduism has been India's primary religion for countless years. Before 2000 B.C.E., when the Harappa Civilization of the Indus Valley flourished, the religion is said to have its roots. Hinduism is now widely recognised as a polytheistic religion that combines the veneration of several gods with the conviction in a single divine reality (Molloy 78). Puja, which is a kind of devotion that a person offers to the image of a god or couple of deities, is a crucial component of this ancient religion. It is necessary to bring all Pooja supplies from the market. In this situation, carrying out this religious rite turns into an exercise if the area we reside in is unfamiliar or if we have only recently moved there. One must discover the solutions to every query, from where to obtain Supplies to where to deliver the items. Vedik Pooja is a distinctive website that addresses user needs, recommends the fundamental items of components required for the procedure, and deals with the poojas that users desire to perform. It is an automated system that also enables access to all Pooja-related information for individuals all around the world. Users can also communicate with pandits online to learn more about their respective fields of expertise. In cities where pandits are difficult to find, this software is quite important.*

Keywords: Vedik Pooja website, pandits, ancient religion

I. INTRODUCTION

There isn't much information available on the origins of puja, making its history simple. No literary or archaeological evidence exists to suggest that the Aryans, who inhabited India throughout the Vedic era, worshipped gods in iconic forms. According to experts, puja gained popularity between 300 and 750 C.E., during the later puranic period (Cush, Robinson, and York 633). Theism and the rise in popularity of temple construction were hallmarks of this era. Eventually, the primary ritual at the time—the vedic sacrificial yajna—took the place of puja. Puja may be conducted by anybody and is meant to honour the god, unlike yajna, which had to be performed by priests and was intended to please a deity. Because the Bhagavadgita recognised puja as the centre of bhakti, or loving devotion, it quickly gained even greater popularity.

Even after a person is born, several religious rites must be done. There are several religious rites practised in Hinduism, including the 16 Sanskars and other forms of Vastu, Shanti, and Yagya devotion. The Muhurta and the Pandit who will be present at that Muhurta are the first two things to be viewed when it comes to carrying out these religious procedures. There is no assurance that the Pandit will arrive at the scheduled time, and even if he does, there is no guarantee that he will have the required materials for the ritual with him. In this case, the ritual must be completely prepared before he arrives.

It is necessary to bring all Pooja supplies from the market. In this situation, carrying out this religious rite turns into an exercise if the area we reside in is unfamiliar or if we have only recently moved there. One must discover the solutions to every query, from where to obtain Supplies to where to deliver the items. VedikPooja is a distinctive website that addresses user needs, recommends the fundamental items of components required for the procedure, and deals with the poojas that users desire to perform. It is an automated system that also enables access to all Pooja-related information for individuals all around the world. Users can also communicate with pandits online to learn more about their respective fields of expertise. In cities where pandits are difficult to find, this software is quite important.

It differs from other online pandit software in that it just provides the contact information of priests so that you can make an appointment with them and have the rites performed at your house. In this situation, carrying out this religious rite turns into an exercise if the area we reside in is unfamiliar or if we have only recently moved there. One must discover the solutions to every query, from where to obtain Supplies to where to deliver the items.

The sizable populace of India is unique and devoted. The most popular way to worship God in practically every Indian home is through "pooja." Even now, despite the rapid advancement, Indians still adhere to all religious traditions. Everyone occasionally requires a pandit for Pooja, whether it is for anhomam, a Pooja, or another auspicious event. As so many people adhere to these traditions that have been passed down through the generations, it is crucial to comprehend their significance and historical background. In the past, most households had a family purohit who visited sometimes and performed all poojas in the home. Nonetheless, individuals are travelling around for jobs because of the diversified workplace. They are unable to locate adequate pandits for ceremonies, if someone has scheduling conflicts, etc. Online and digitalization play a big part in all of these situations.

II. OBJECTIVES

The main objectives of the paper is to :

- Users may be assigned to the Pandit with ease.
- Pooja-style searches are feasible.
- Help the user save time.

III. PROBLEM STATEMENT

People in the countryside and from outside (like the city) are looking for pandits to do puja. The goal of "VedikPooja" is to manage all activities associated with poojas and catering. The way we suggested in this paper can maintain track of all the details of poojas and catering services. The user doesn't need to travel far to find a pandit and a cook. The programme offers profiles of pandit and caterer in addition to all relevant information on Indian religious aartis and Poojas.

IV. NEED OF WORK

A website called PoojaPandit offers astrology services, Vedic rituals, religious ceremonies, and Hindu Pooja services. We provide renowned, highly skilled, and experienced Shastries and Pandits from India who come to your home and do the Pooja. We also offer online poojasamagri for pooja materials as part of our services. We want to offer you the best services at fair costs.

PoojaPandit offers affordable services for various types of poojas, including Namakaran, Mundan, Birthday, Janeu (Sacred Thread), SatyaNarayan, GrihaPravesh, Bhoomi, Navagraha Shanti, Vastu, Rudra Abhishek, Bhagwat Katha, Sunderkand, Ramayan, Laxmi, and Ganesh poojas. We are here to assist you in finding proficient pandits for Hindu rituals.

There are a great number of customs still practised today in India. Here, you may effortlessly learn about a wide variety of cultures, religions, and customs. Doing Pooja for future wellbeing is one of the most popular customs. One way to show adoration for god via various rituals is through pooja. It will be crucial in establishing a connection between the individual and their inner spiritual self. Pooja can be performed for several gods for various purposes. The main motivation to do it is to gain their blessing. Even this part of tradition has been affected by technology, and today people may schedule poojas online through a fantastic website like Divininvite. This is one of the top sites that offers the ability to reserve different kinds of poojas via them.

V. EXISTING SYSTEM

A website called PoojaPandit offers Hindu Pooja services, Vedic rituals, and religious ceremonies. We provide renowned, highly skilled, and experienced Shastries and Pandits from India who come to your home and do the Pooja. We also offer online poojasamagri for pooja materials as part of our services. We want to offer you the best services at fair costs. PoojaPandit offers affordable services for all types of poojas, including Satya Narayan, GrihaPravesh,

Bhoomi, Navagraha, Vastu, RudraAbhishek, Bhagwat Katha, Sunderkand, Ramayan, Laxmi, and Ganesh poojas. We are here to assist you in finding proficient pandits for Hindu rituals.

VI. PROPOSED METHODOLOGY

- **User:** The user must first register or, if they have already done so, sign in.
- **Pandit:** People from all across the nation and from abroad are looking for pandits to do puja. The goal of "VedikPooja" is to manage every pooja-related activity. The user must then choose from a list of pandits who have registered with the website and check out each one's online profile after choosing an aarti that comes with all the materials needed for that specific aarti. The user doesn't have to travel far to find the pandit.
- **Catering:** This study's goal is to measure consumer satisfaction with the catering services they receive from businesses in the Sangli city for events like different kinds of poojas, weddings, etc. The major goals of this study were to recognise the issues that affect customer satisfaction and to ascertain how they relate to it. Customer satisfaction is the dependant variable in this study, while the independent variables include opinion on caterers and the facilities/services they offer, as well as food and service quality. Based on the questions identified by prior research, a survey questionnaire was created. By identifying aspects that affect service and product quality, which in turn affects client satisfaction and aids caterers in making the necessary modifications, this analysis can add to research on the catering industry.

VII. SYSTEM ARCHITECTURE

VIII. IMPLEMENTATION DETAILS

Functional Preconditions

- Independent of how they are implemented, functional requirements explain how the system interacts with its surroundings.
- User: By inputting the website's URL, the user may access the product information.
- He need to be able to look up a certain puja.
- He is only able to observe the specifics; he cannot change them.

Needs that are not functional:

- Non-functional requirements outline features of the system that are visible to users but are not directly connected to how the system functions.
- Human considerations and the user interface
- For viewers, our system offers an excellent graphical user interface with a number of forms.

- Web browsers and any operating systems serve as the user and software product interfaces while the user is online.
- Anyone who is familiar with systems and the web may utilise this

IX. CONCLUSION

In conclusion, Vedic poojas (ritual worship) are essential to Hinduism and are used to show devotion, ask for blessings, and advance spiritually. These can be carried out singly or in a group and frequently include donations of flowers, food, and other things as well as the reciting of prayers and songs.

In conclusion, Hinduism's Vedic poojas (ritual worship) are essential to Hinduism's religious and cultural life and provide a way for people to show their devotion, connect with the divine, and grow spiritually. These poojas incorporate the usage of gifts, mantras and hymns, symbolic gestures, and more. They can range from simple everyday offerings to complex rituals. Hinduism's Vedic poojas are a significant component of the cultural fabric of Hindu communities and serve a spiritual as well as a cultural function. They unite families and communities for shared experiences and uphold cultural traditions and values.

Depending on the particular god being worshipped, the person's personal beliefs, and the regional and cultural traditions of the Hindu community, the precise form and substance of a Vedic puja will change. Regardless of the specifics, Vedic poojas are seen as a means of establishing a connection with the divine and demonstrating thanks, dedication, and reverence for the heavenly powers that govern the cosmos.
